Chapter 1. What's new in version 1.1

This topic provides information about new and enhanced features of Lenovo XClarity Integrator Management Pack for VMware vRealize Operations Manager, v1.1.

New software support

- VMware vRealize Operations Manager 8.4, 8.5, and 8.6
- Lenovo XClarity Administrator 3.5.0

Enhancement

- Display the ESXi Host System name mapped with BMC in the alert details

Chapter 2. Known limitations

The following limitations apply to the Lenovo XClarity vROps, *Version 1.1*:

Problems

- Alert threshold values are not displayed
- Top-10 widgets taking a minimum of 4 collection cycles to reflect the data.
- The scoreboard widget displays the data automatically based on the selected object.
- All alerts present on the LXCA are not displayed.
- The child widgets contain the data which is not changed unless you select the server (parent) resource.

Workaround

To view the object data of the child widgets, you must select the parent resource each time to render updated data. For example; In the Lenovo Power and thermal dashboard, the rack is a parent resource and top-level selector. Under rack, the server is a child, and the server has multiple child widgets. Select one server to populate the child widgets of the server. Later if you select a rack but did not select a server, the previously selected server data is present on the server child widgets.

Appendix A. Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area.

Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any other product, program, or service.

Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document is not an offer and does not provide a license under any patents or patent applications. You can send inquiries in writing to the following:
