Service technician only

New secure activation code after system board replacement	
---	--

- For ThinkSystem SE350 with Security Pack, the Secure Activation Code is used when claiming the system for activation or when the system board is replaced.
- For ThinkSystem SE350 Standard, the Secure Activation Code is used when the system board is replaced.

Note: The Secure Activation Code can also be found on the network access tag on the front of the server or using the ThinkShield Edge mobile app.

**ATTENTION: DO NOT THROW AWAY**

Activate the System

SE350 with Security Pack is shipped in locked state for security, the following procedures must be completed to be able to boot up and fully functional.

1. Create a Lenovo ID and activate via Mobile App or Lenovo XClarity Controller.
2. Change the System Lockdown Mode through Lenovo XClarity Controller.
3. Backup the Self Encryption Drive Authentication Key (SED AK).
