# ATTENTION: DO NOT THROW AWAY

**Note:** Check which of the following your system is in Lenovo XClarity Controller.

| ThinkEdge Security Pack Enabled | ThinkEdge Security Pack Disabled |
|---|---|
| • Automatic data protection can be enabled.<br>• SED data access can be locked up at tamper events.<br>• It is required to claim and activate the system before accessing data. Please keep this document for the process.<br>• Boot up and full functions of the system require activation. | • Automatic data protection is disabled.<br>• Passphrase based SED management can be enabled, but data access will never be locked up on tamper event. Tamper setting is disabled.<br>• No activation is required.<br>• Claiming the system is optional. Secure Activation Code is required to claim the system.<br>• Keep this document for future reference. |

## Secure Activation Code

*Server information for activation*

| | |
|---|---|
| Machine Type | |
| Serial Number | |
| Secure Activation Code | |

*Service technician only*

| | |
|---|---|
| New secure activation code after system board replacement | |

- For ThinkEdge Security Pack Enabled, Secure Activation Code is used when claiming the system for activation or when replacing the system board.
- For ThinkEdge Security Pack Disabled, Secure Activation Code is used when the system board is replaced.

**Note:** The Secure Activation Code can also be found on the network access tag on the front of the server, or in ThinkShield Edge mobile app.

## ATTENTION: DO NOT THROW AWAY

## Activate the System

ThinkEdge Security Pack Enabled is shipped in locked state for security, while the following procedure must be completed before booting up a fully functional server.

1. Create a Lenovo ID and activate the system via Mobile App or Lenovo XClarity Controller.

2. Change the System Lockdown Mode through Lenovo XClarity Controller.

3. Backup the Self Encryption Drive Authentication Key (SED AK).
