Lenovo

ThinkSystem SR650 V4
Internal Cable Routing Guide

Machine Type: 7DGC, 7DGD, 7DGE, 7DGF, 7DLN, 7DK2

Note

Before using this information and the product it supports, be sure to read and understand the safety information and the safety instructions, which are available at:
https://pubs.lenovo.com/safety_documentation/

In addition, be sure that you are familiar with the terms and conditions of the Lenovo warranty for your server, which can be found at:
http://datacentersupport.lenovo.com/warrantylookup

First Edition (April 2025)

Safety

Before installing this product, read the Safety Information.

قبل تركيب هذا المنتج، يجب قراءة الملاحظات الآمنية

Antes de instalar este produto, leia as Informações de Segurança.

在安装本产品之前，请仔细阅读 Safety Information （安全信息）。

安裝本產品之前，請先閱讀「安全資訊」。

Prije instalacije ovog produkta obavezno pročitajte Sigurnosne Upute.

Před instalací tohoto produktu si přečtěte příručku bezpečnostních instrukcí.

Læs sikkerhedsforskrifterne, før du installerer dette produkt.

Lees voordat u dit product installeert eerst de veiligheidsvoorschriften.

Ennen kuin asennat tämän tuotteen, lue turvaohjeet kohdasta Safety Information.

Avant d'installer ce produit, lisez les consignes de sécurité.

Vor der Installation dieses Produkts die Sicherheitshinweise lesen.

Πριν εγκαταστήσετε το προϊόν αυτό, διαβάστε τις πληροφορίες ασφάλειας (safety information).

לפני שתתקינו מוצר זה, קראו את הוראות הבטיחות.

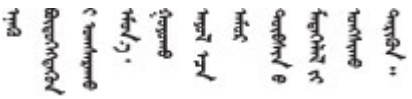
A termék telepítése előtt olvassa el a Biztonsági előírásokat!

Prima di installare questo prodotto, leggere le Informazioni sulla Sicurezza.

製品の設置の前に、安全情報をお読みください。

본 제품을 설치하기 전에 안전 정보를 읽으십시오.

Пред да се инсталира овој продукт, прочитајте информацијата за безбедност.



Les sikkerhetsinformasjonen (Safety Information) før du installerer dette produktet.

Przed zainstalowaniem tego produktu, należy zapoznać się z książką "Informacje dotyczące bezpieczeństwa" (Safety Information).

Antes de instalar este produto, leia as Informações sobre Segurança.

Перед установкой продукта прочтите инструкции по технике безопасности.

Pred inštaláciou tohto zariadenia si pečítaje Bezpečnostné predpisy.

Pred namestitvijo tega proizvoda preberite Varnostne informacije.

Antes de instalar este producto, lea la información de seguridad.

Läs säkerhetsinformationen innan du installerar den här produkten.

Safety inspection checklist

Use the information in this section to identify potentially unsafe conditions with your server. As each machine was designed and built, required safety items were installed to protect users and service technicians from injury.

Note: The product is not suitable for use at visual display workplaces according to §2 of the Workplace Regulations.

Note: The set-up of the server is made in the server room only.

CAUTION:
This equipment must be installed or serviced by trained personnel, as defined by the IEC 62368-1, the standard for Safety of Electronic Equipment within the Field of Audio/Video, Information Technology and Communication Technology. Lenovo assumes you are qualified in the servicing of equipment and trained in recognizing hazards energy levels in products. Access to the equipment is by the use of a tool, lock and key, or other means of security, and is controlled by the authority responsible for the location.

Important: Electrical grounding of the server is required for operator safety and correct system function. Proper grounding of the electrical outlet can be verified by a certified electrician.

Use the following checklist to verify that there are no potentially unsafe conditions:

1. Make sure that the power is off and the power cord is disconnected.
2. Check the power cord.
   - Make sure that the third-wire ground connector is in good condition. Use a meter to measure third-wire ground continuity for 0.1 ohm or less between the external ground pin and the frame ground.
   - Make sure that the power cord is the correct type.

     To view the power cords that are available for the server:

     a. Go to:

http://dcsc.lenovo.com/#/

b. Click **Preconfigured Model** or **Configure to order**.

c. Enter the machine type and model for your server to display the configurator page.

d. Click **Power → Power Cables** to see all line cords.

- Make sure that the insulation is not frayed or worn.

3. Check for any obvious non-Lenovo alterations. Use good judgment as to the safety of any non-Lenovo alterations.
4. Check inside the server for any obvious unsafe conditions, such as metal filings, contamination, water or other liquid, or signs of fire or smoke damage.
5. Check for worn, frayed, or pinched cables.
6. Make sure that the power-supply cover fasteners (screws or rivets) have not been removed or tampered with.

Internal cable routing

See this section to do cable routing for specific components.

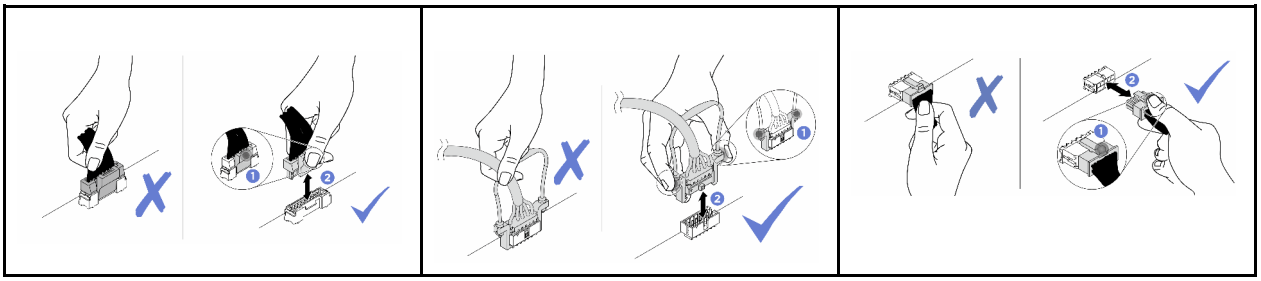
Notes: Follow below guidelines when connecting cables:

- Turn off the server before you connect or disconnect any internal cables.
- See the documentation that comes with any external devices for additional cabling instructions. It might be easier for you to route cables before you connect the devices to the server.
- Cable identifiers of some cables are printed on the cables that come with the server and optional devices. Use these identifiers to connect the cables to the correct connectors.
- Ensure that the cable is not pinched and does not cover any connectors or obstruct any components on the system board assembly.
- Ensure that the relevant cables pass through the cable clips.

Attention: Strictly observe the following instructions to avoid damaging cable sockets on the system board assembly. Any damage to the cable sockets might require replacing the system board assembly.

- Connect cable connectors vertically or horizontally in alignment with the orientations of the corresponding cable sockets, avoiding any tilt.
- To disconnect cables from the system board assembly, do as follows:
  1. Press and hold all latches, release tabs, or locks on cable connectors to release the cable connectors.
  2. Remove the cable connectors vertically or horizontally in alignment with the orientations of the corresponding cable sockets, avoiding any tilt.

     Note: The cable connectors might look different from those in the illustration, but the removal procedure is the same.



Identifying connectors

See this section to locate and identify the connectors on the electric boards.

- “Drive backplane connectors” on page 1
- “System-board-assembly connectors for cable routing” on page 5

Drive backplane connectors

See this section to locate the connectors on the drive backplanes.

The server supports the following backplanes depending on server configurations:

- “8 x 2.5-inch SAS/SATA front backplane” on page 2

- “8 x 2.5-inch AnyBay front backplane” on page 2
- “12 x 3.5-inch SAS/SATA front backplane” on page 2
- “12 x 3.5-inch AnyBay front backplane” on page 3
- “4 x 2.5-inch SAS/SATA middle/rear backplane” on page 3
- “4 x 2.5-inch AnyBay middle/rear backplane” on page 3
- “4 x 3.5-inch SAS/SATA rear backplane” on page 3
- “8 x 2.5-inch SAS/SATA rear backplane” on page 3
- “E3.S drive backplane” on page 4
- “Front M.2 boot backplane and controller board” on page 4
- “Rear M.2 backplane” on page 4

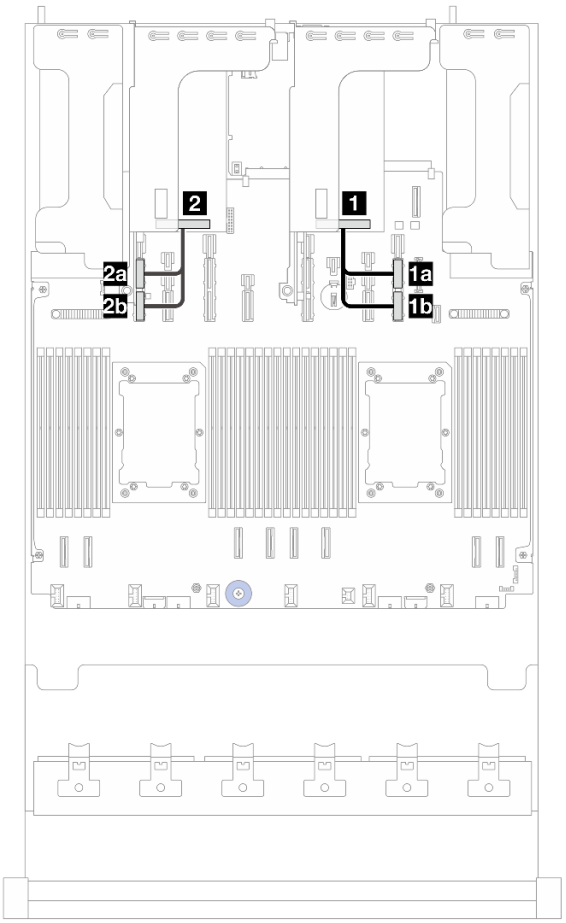
ConnectX-8 adapter cable routing

This section provides cable routing information for the ConnectX-8 InfiniBand adapter.

- “ConnectX-8 adapter cable routing in scenario 1” on page 9
- “ConnectX-8 adapter cable routing in scenario 2” on page 9

ConnectX-8 adapter cable routing in scenario 1

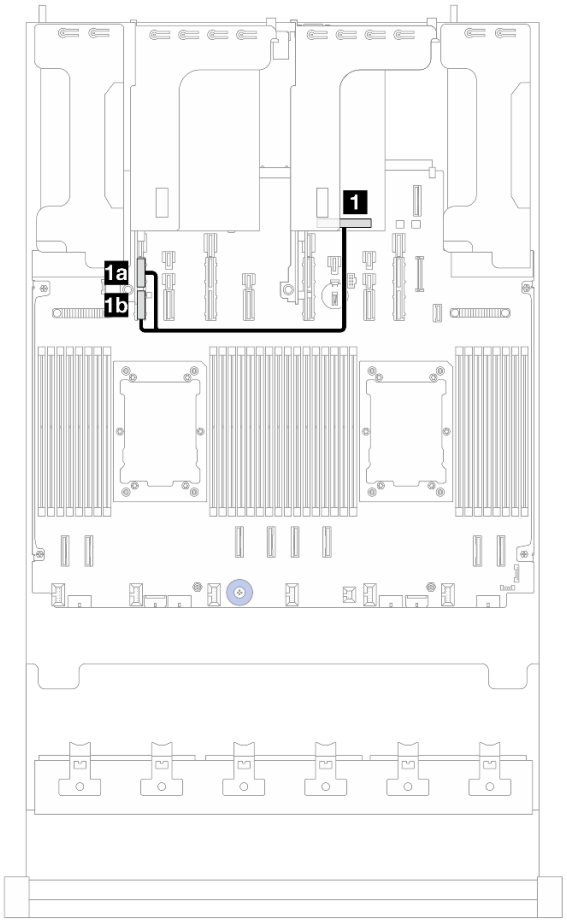
Scenario 1: The server is equipped with two processors and two ConnectX-8 adapters (cable 1 and cable 2) or one processor and one ConnectX-8 adapter (cable 1).



From	To (processor board)	Cable length
1 ConnectX-8 adapter on slot 5	1a PCIe 9A	300 mm
	1b PCIe 9B	
2 ConnectX-8 adapter on slot 7	2a PCIe 15A	300 mm
	2b PCIe 15B	

ConnectX-8 adapter cable routing in scenario 2

Scenario 2: The server is equipped with two processors and one ConnectX-8 adapter.



From	To (processor board)	Cable length
1 ConnectX-8 adapter on slot 5	1a PCIe 15A	300 mm
	1b PCIe 15B	

Front M.2 boot backplane and controller board cable routing

This section provides cable routing information for the front M.2 boot backplane and controller board.

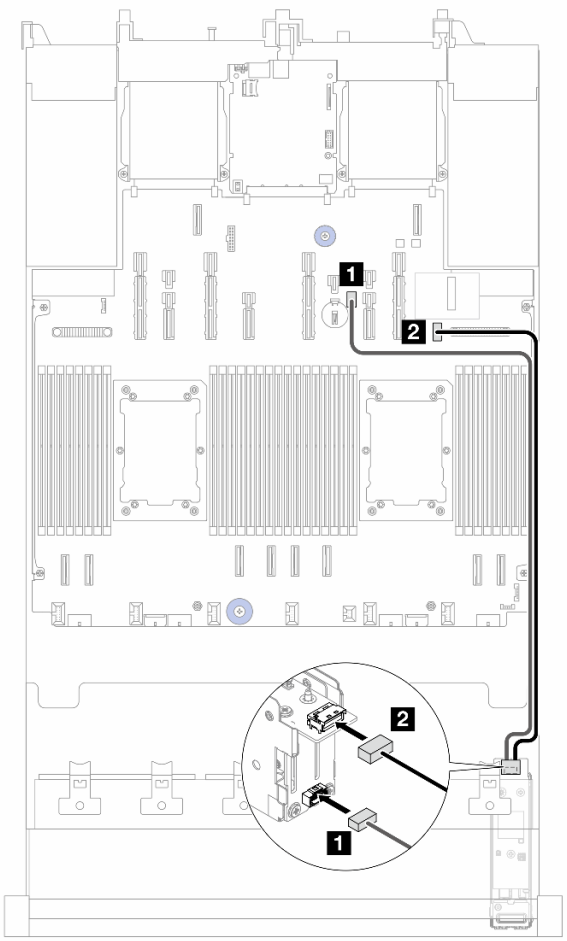


Figure 5. Cable routing for front M.2 boot backplane and controller board

From	To (processor board)	Length
1 M.2 boot backplane	1 M.2 power connector	700 mm
2 M.2 controller board	2 M.2 backplane signal connector	650 mm

Internal M.2 backplane cable routing

This section provides cable routing information for the internal M.2 backplane.

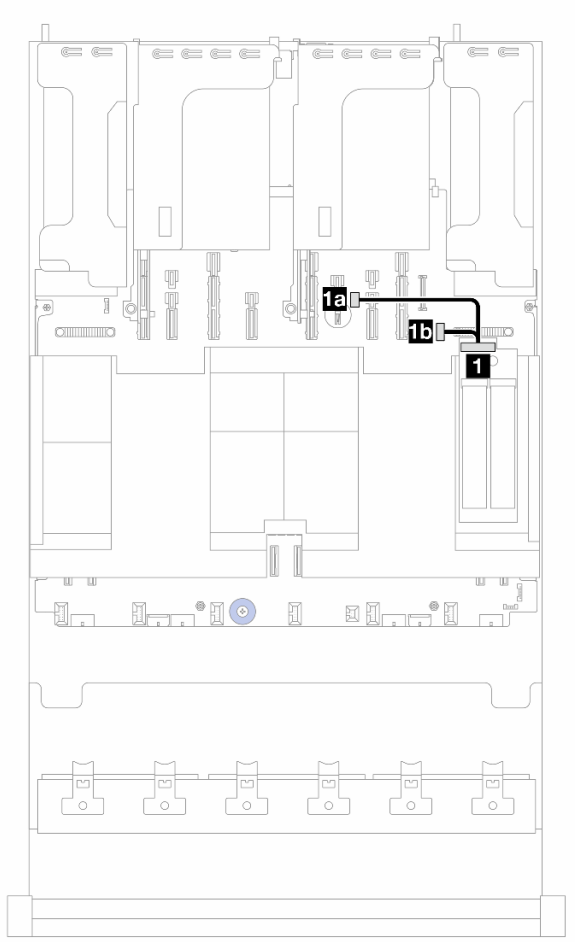

Figure 6. Cable routing for internal M.2 backplane

From	To (processor board)	Length
1 Internal M.2 backplane	1a M.2 power connector	400/400 mm
	1b M.2 backplane signal connector	

GPU adapter cable routing

This section provides cable routing information for the GPU adapters.

Notes:

- The GPU power cable is needed only when GPU power is greater than or equal to 75 W.
- The location of the GPU adapter may differ from that shown in the illustration, but the cable routing is similar.
- For riser card cable routing, see “Riser card cable routing” on page 20.

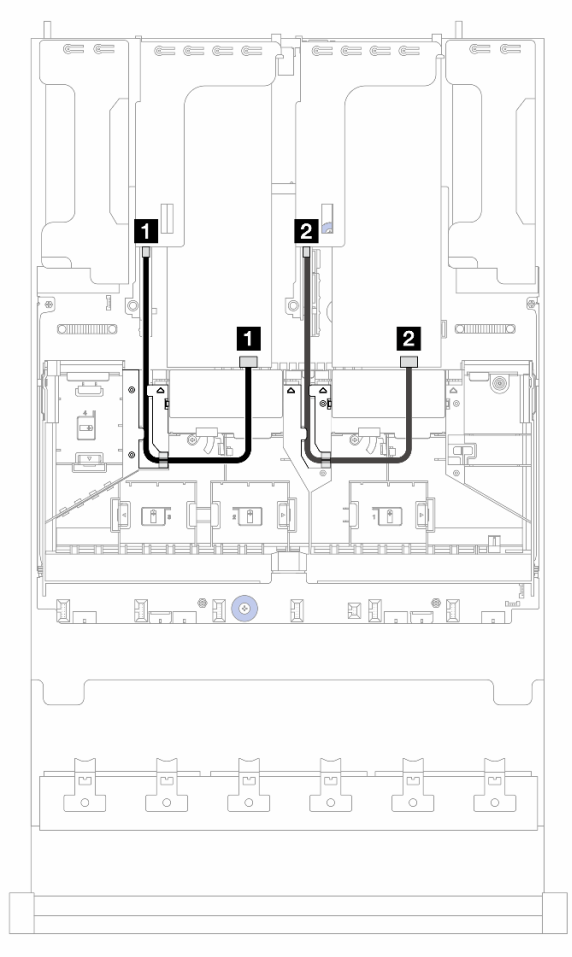

Figure 7. Cable routing for GPU adapters

From (GPU adapter)	To (riser card)	Length
1 Power connector	1 Power connector	320 mm
2 Power connector	2 Power connector	320 mm

Left and right rack latch cable routing

This section provides cable routing information for the left rack latch with USB/MiniDP and the right rack latch (with front operator panel).

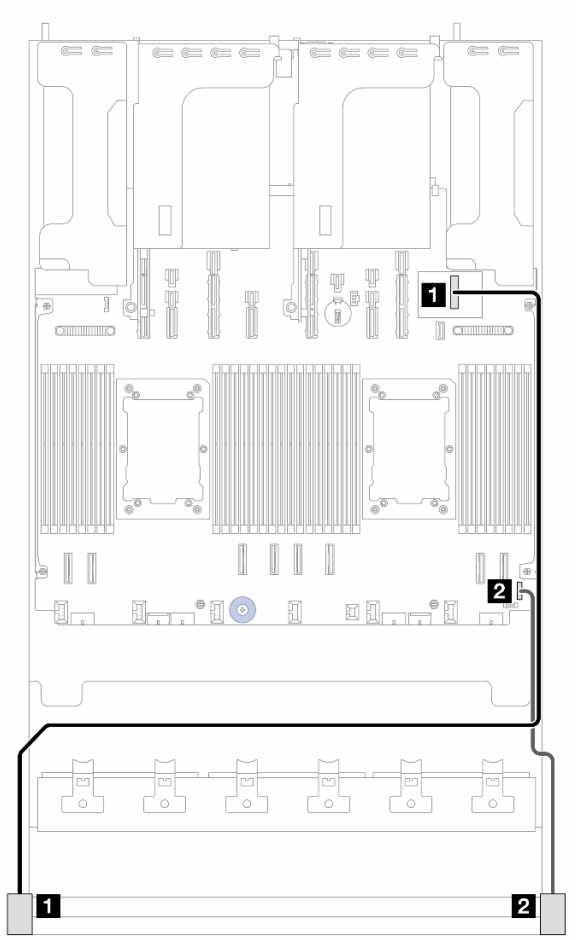

Figure 8. Cable routing for left and right rack latches

From	To	Length
1 Left rack latch with USB/MiniDP	1 USB I/O board	1100 mm
2 Right rack latch	2 Front I/O connector on the processor board	550 mm

Lenovo Processor Neptune® Core Module cable routing

This section provides cable routing information for the Processor Neptune Core Module.

Note: For better cable arrangement, it is required to install the hoses and leakage detection sensor module to a designated holder, and make sure that the module is secured in holder clips. Use the illustration below or “Install the Processor Neptune™ Core Module” in *User Guide* or *Hardware Maintenance Guide* for details.

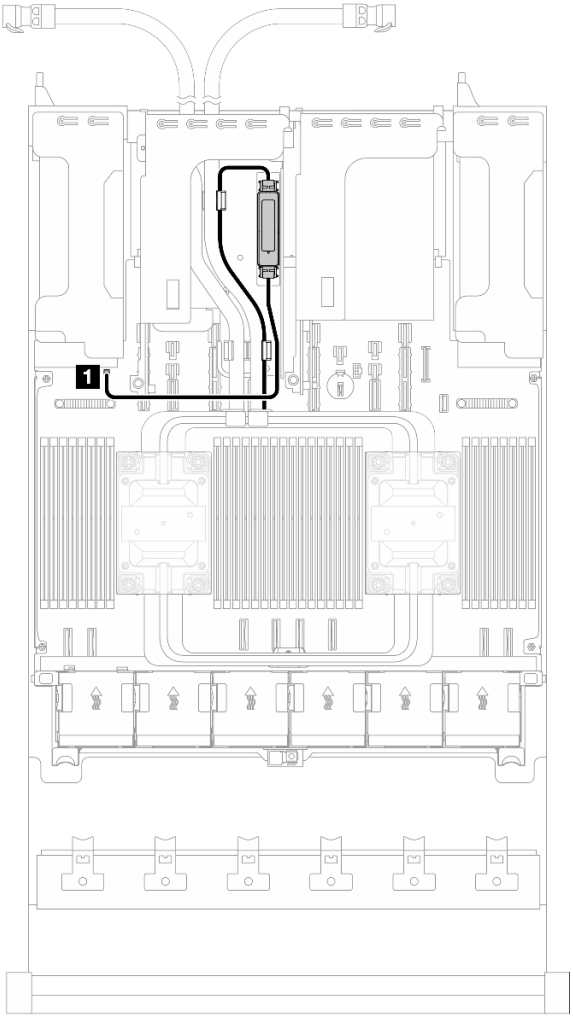

Figure 9. Cable routing for Processor Neptune Core Module

From	To (processor board)
Leak detection cable	1 Leak detection connector 2

Management NIC adapter cable routing

This section provides cable routing information for the management NIC adapter.

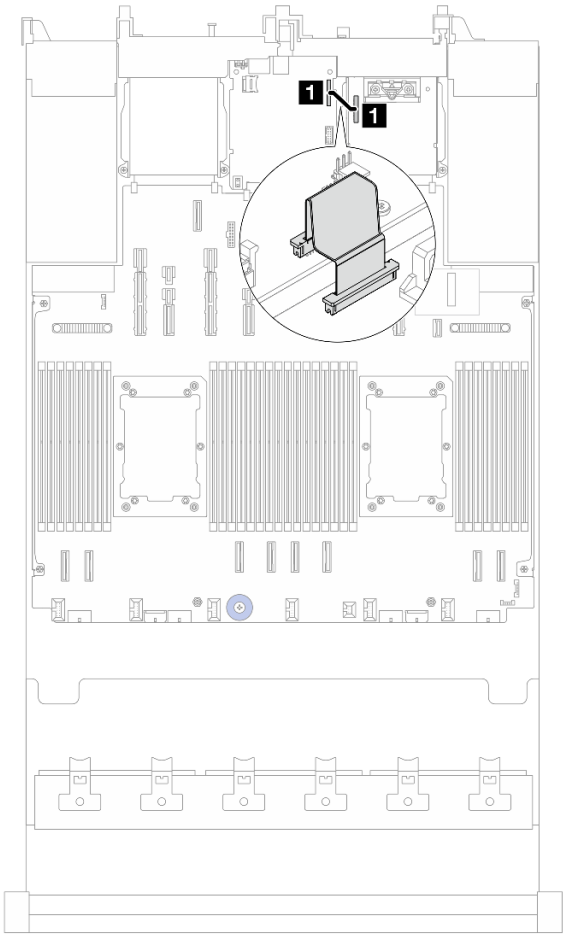

Figure 10. Cable routing for management NIC adapter

From	To (system I/O board)
1 Management NIC adapter	1 Second management Ethernet connector

OCP module cable routing

This section provides cable routing information for OCP modules with PCIe x16 connection.

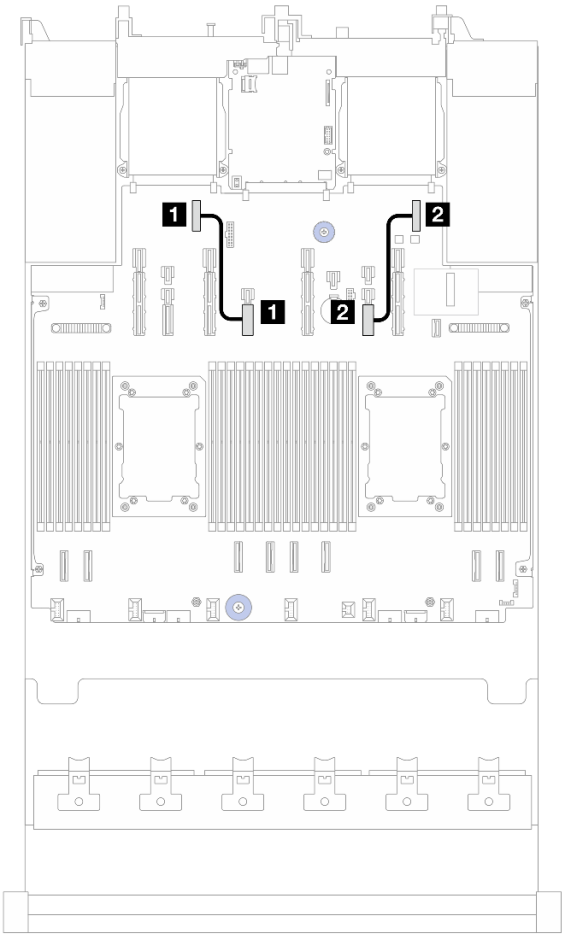

Figure 11. Cable routing for OCP modules with PCIe x16 connection

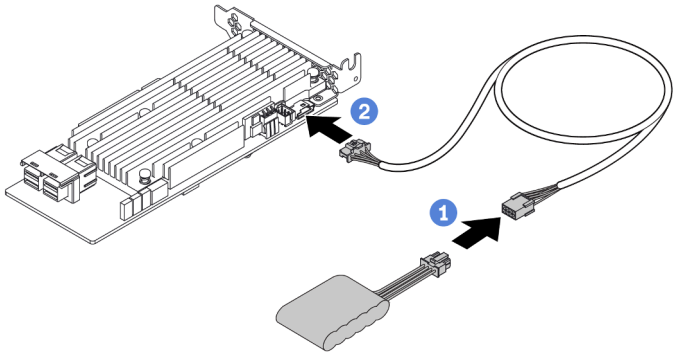
From (processor board)	To (processor board)	Length
1 OCP expansion connector 2	1 PCIe connector 12	160 mm
2 OCP expansion connector 1	2 PCIe connector 10	160 mm

RAID flash power module cable routing

This section provides cable routing information for RAID flash power modules (also known as supercap).

For locations of RAID flash power modules, see “RAID flash power module replacement” in *User Guide* or *Hardware Maintenance Guide*.

An extension cable is provided for each RAID flash power module for cable connection. Connect the cable from the RAID flash power module to the corresponding RAID adapter as shown.



From	To
RAID flash power module	Supercap connector on the RAID adapter

Rear M.2 backplane cable routing

This section provides cable routing information for the rear M.2 backplane.

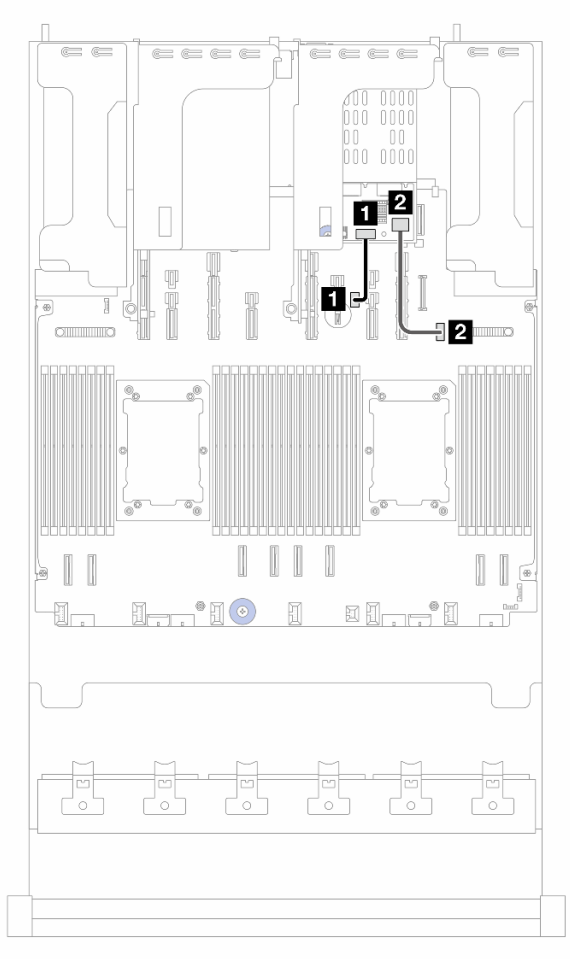


Figure 12. Cable routing for rear M.2 backplane

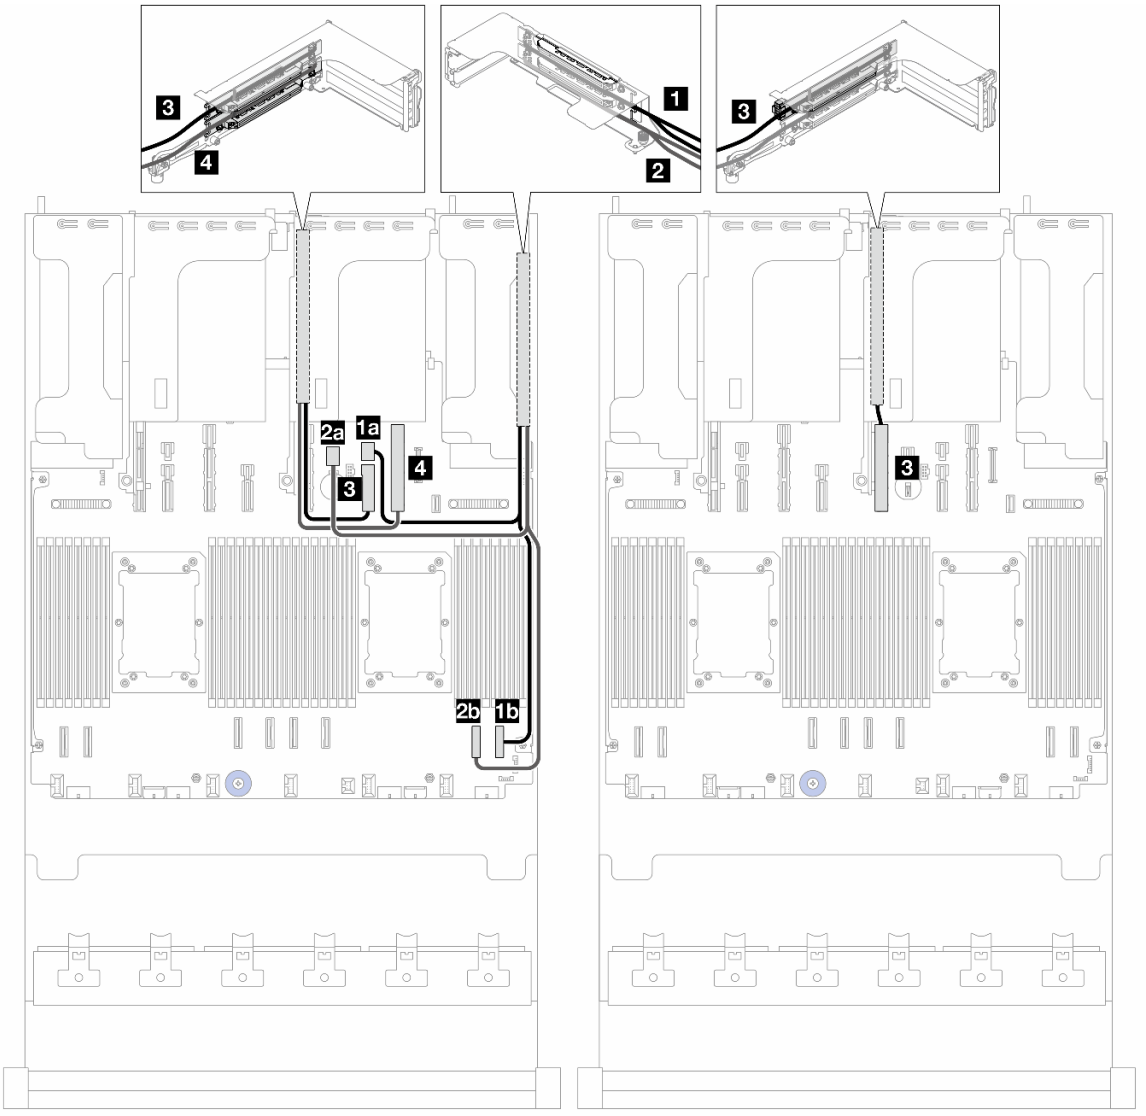
From (rear M.2 backplane)	To (processor board)	Length
1 Power connector	1 M.2 power connector	320 mm
2 Signal connector	2 M.2 backplane signal connector	310 mm

Riser card cable routing

This section provides cable routing information for the riser cards.

- “Cable routing for riser cards corresponding to processor 1” on page 20
- “Cable routing for riser cards corresponding to processor 2” on page 21
- “Cable routing for riser cards in configurations with 8 x 2.5-inch rear drive bays” on page 22

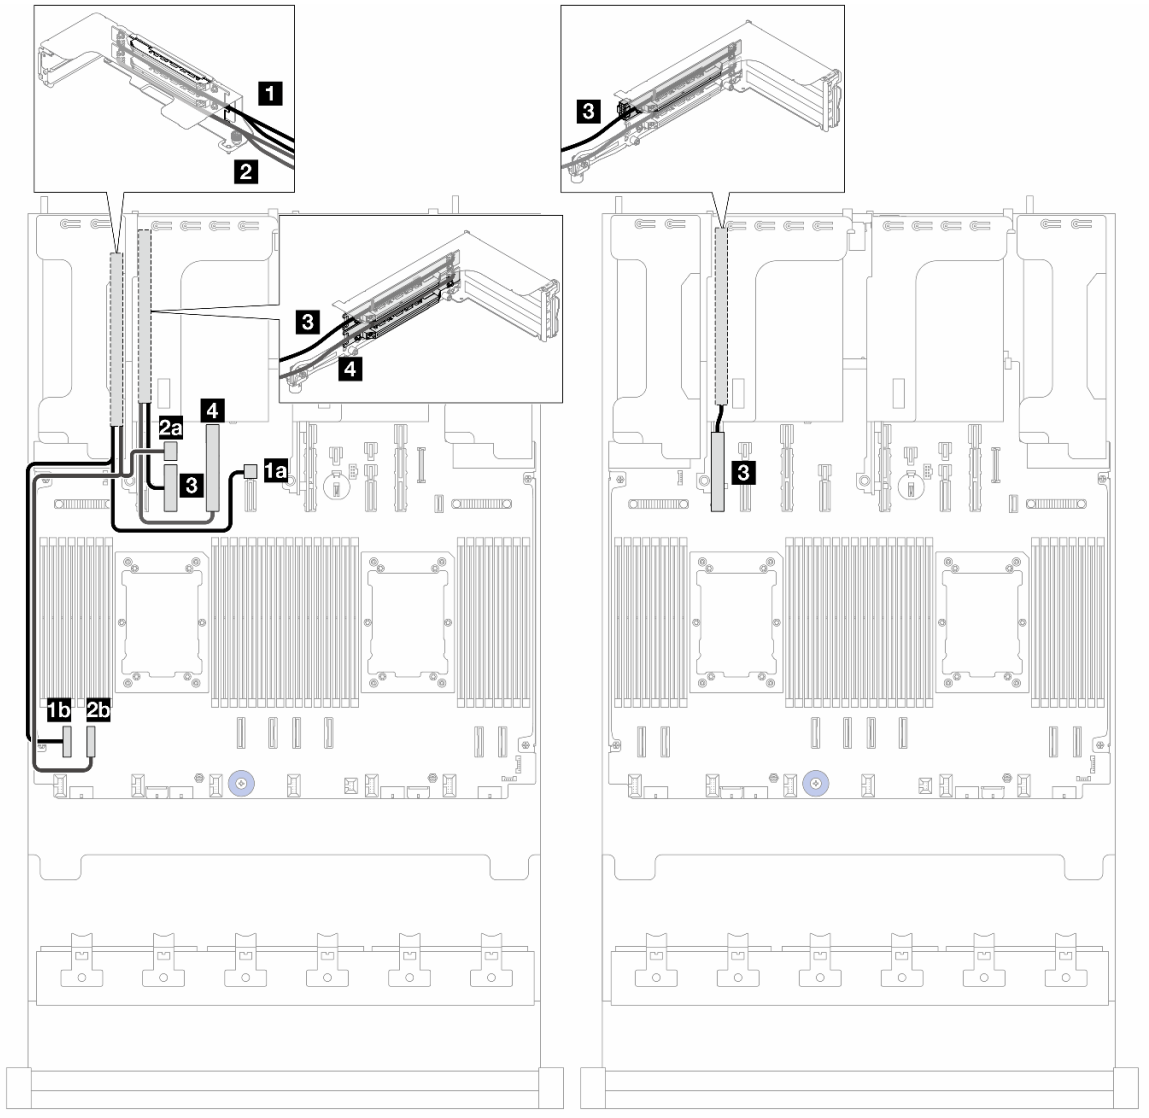
Cable routing for riser cards corresponding to processor 1



From	To (processor board)	Cable length
1 Riser card on slot 1	1a PWR 20	500/400 mm
	1b PCIe 1	
2 Riser card on slot 2	2a PWR 21	500/400 mm
	2b PCIe 2	
3 Riser card on slot 3	3 PCIe & PWR 10 (when slot 5 is occupied)	350 mm

From	To (processor board)	Cable length
	3 PCIe & PWR 11 (when slot 5 is empty)	300 mm
4 Riser card on slot 4	4 PCIe & PWR 9	300 mm

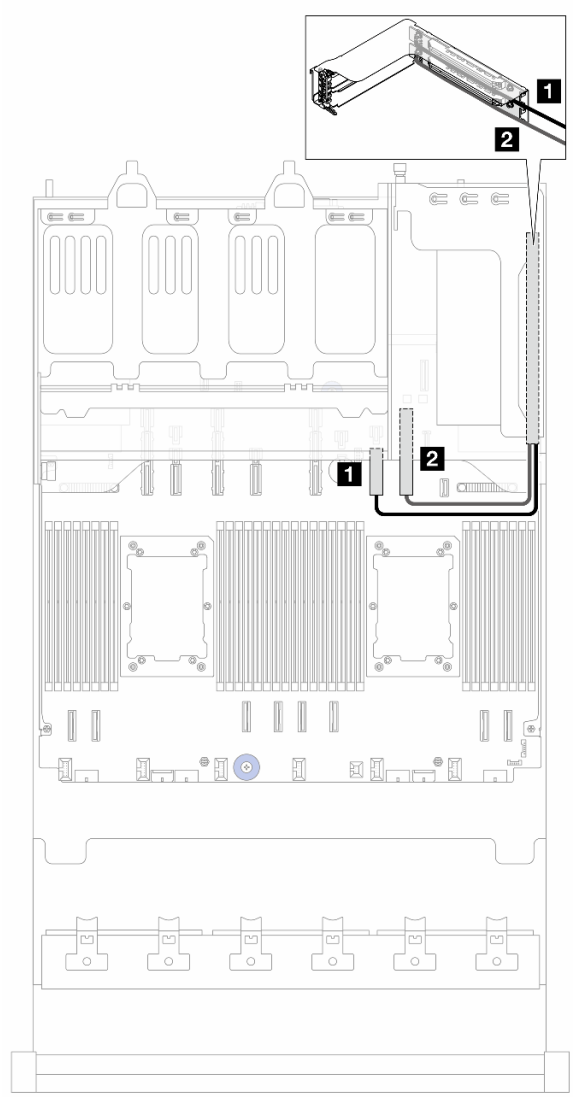
Cable routing for riser cards corresponding to processor 2



From	To (processor board)	Cable length
1 Riser card on slot 9	1a PWR 12	500/400 mm
	1b PCIe 8	
2 Riser card on slot 10	2a PWR 23	500/400 mm
	2b PCIe 7	
3 Riser card on slot 6	3 PCIe & PWR 14 (when slot 8 is occupied)	350 mm

From	To (processor board)	Cable length
	3 PCIe & PWR 15 (when slot 8 is empty)	300 mm
4 Riser card on slot 7	4 PCIe & PWR 13	300 mm

Cable routing for riser cards in configurations with 8 x 2.5-inch rear drive bays



From	To (processor board)	Cable length
1 Riser card on slot 1	1 PCIe & PWR 10	350 mm
2 Riser card on slot 2	2 PCIe & PWR 9	300 mm

Serial port module cable routing

This section provides cable routing information for the serial port module.

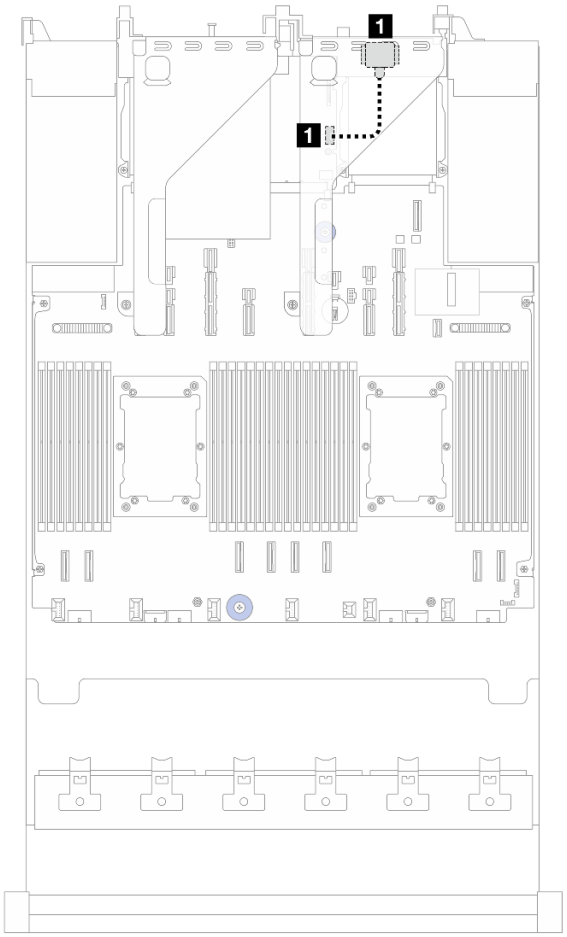


Figure 13. Cable routing for serial port module

From	To (system I/O board)	Length
1 Serial port module	1 Serial port connector	220 mm

Drive backplane cable routing: 2.5-inch chassis without Compute Complex Neptune Core Module

This section provides backplane cable connection information for server models with 2.5-inch front drive bays and without Compute Complex Neptune Core Module.

Power cable connections

Notes:

- For connectors on each drive backplane, see “Drive backplane connectors” on page 1.
  - Front backplanes (BP1/2/3):
    - 8 x 2.5-inch SAS/SATA front backplane
    - 8 x 2.5-inch AnyBay front backplane (also used as an 8 x 2.5-inch NVMe front backplane when only NVMe connectors on the backplane are cabled)
  - Middle backplanes (BP10/11):
    - 4 x 2.5-inch SAS/SATA middle/rear backplane
    - 4 x 2.5-inch AnyBay middle/rear backplane (also used as a 4 x 2.5-inch NVMe middle/rear backplane when only NVMe connectors on the backplane are cabled)
  - Rear backplane (BP9):
    - 4 x 2.5-inch SAS/SATA middle/rear backplane
    - 4 x 2.5-inch AnyBay middle/rear backplane (also used as a 4 x 2.5-inch NVMe middle/rear backplane when only NVMe connectors on the backplane are cabled)
    - 8 x 2.5-inch SAS/SATA rear backplane
- The following uses the 4 x 2.5-inch middle/rear backplane as an example of BP9 for illustration. The cable routing for 8 x 2.5-inch rear backplane is similar.

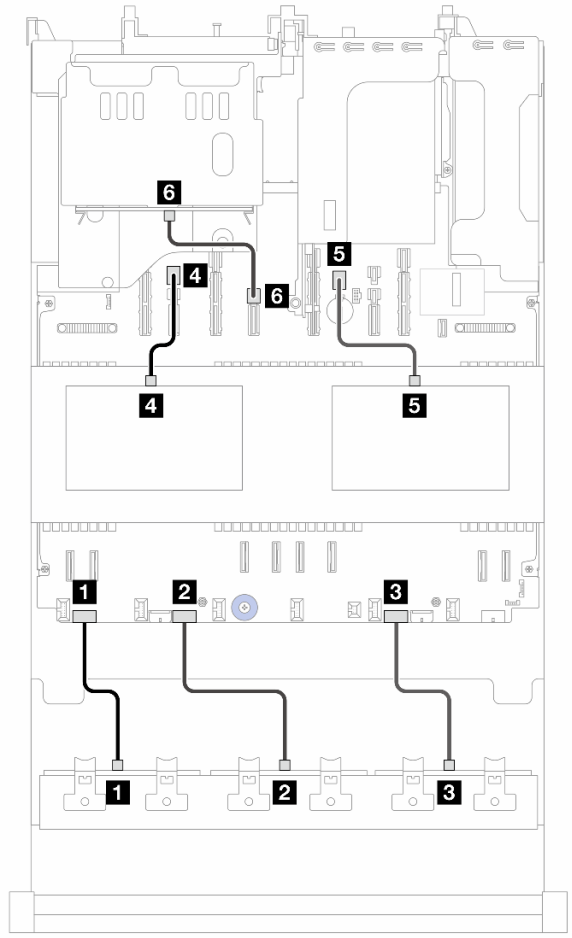

Figure 14. Power cable connections

From	To (processor board)	Length
1 BP1: PWR	1 PWR 1	250 mm
2 BP2: PWR	2 PWR 2	250 mm
3 BP3: PWR	3 PWR 3	250 mm
4 BP10: PWR	4 PWR 23	250 mm
5 BP11: PWR	5 PWR 21	250 mm
6 BP9: PWR	6 PWR 12	250 mm

Signal cable connections

Refer to the specific topic for signal cable connections depending on the backplanes you have installed.

- “Front backplanes only” on page 26
- “Front + Rear backplanes” on page 53
- “Front + Middle backplanes” on page 77
- “Front + Middle + Rear backplanes” on page 90

Front backplanes only

This section provides cable routing information for the server models with front drive bays only.

- “8/16/24 x 2.5" SAS/SATA” on page 26
- “8/16/24 x 2.5" AnyBay (tri-mode)” on page 29
- “8/16/24 x 2.5" AnyBay/NVMe” on page 32
- “8 x 2.5" SAS/SATA + 8 x 2.5" AnyBay/NVMe” on page 39
- “8 x 2.5" AnyBay + 8 x 2.5" NVMe” on page 42
- “8 x 2.5" SAS/SATA + 16 x 2.5" NVMe” on page 45
- “16 x 2.5" SAS/SATA + 8 x 2.5" AnyBay/NVMe” on page 49

8/16/24 x 2.5" SAS/SATA

This topic provides cable routing information for the 8 x 2.5"/16 x 2.5"/24 x 2.5" SAS/SATA configuration.

- “Cable routing to SFF 8i/16i adapter (config. 1/3/4/6/7)” on page 26
- “Cable routing to CFF 16i adapter (config. 2/5/8)” on page 28
- “Cable routing to SFF 8i adapter (config. 8)” on page 28

The configuration numbers in the table below are for descriptive purposes only.

BP config.	Storage controller	Config. No.
8 x 2.5" SAS/SATA (BP1)	1 x SFF 8i/16i	1
	1 x CFF 16i	2
16 x 2.5" SAS/SATA (BP1 + BP2)	2 x SFF 8i	3
	1 x SFF 16i	4
	1 x CFF 16i	5
24 x 2.5" SAS/SATA (BP1 + BP2 + BP3)	3 x SFF 8i	6
	SFF 16i + 8i	7
	SFF 8i + CFF 16i	8

Cable routing to SFF 8i/16i adapter (config. 1/3/4/6/7)

Notes:

- The location of the adapter and cable connectors on the adapter may differ from those shown in the illustration. For details, see the table below.
- Cable 3 is needed only in the 3 x SFF 8i or SFF 16i + 8i configuration.

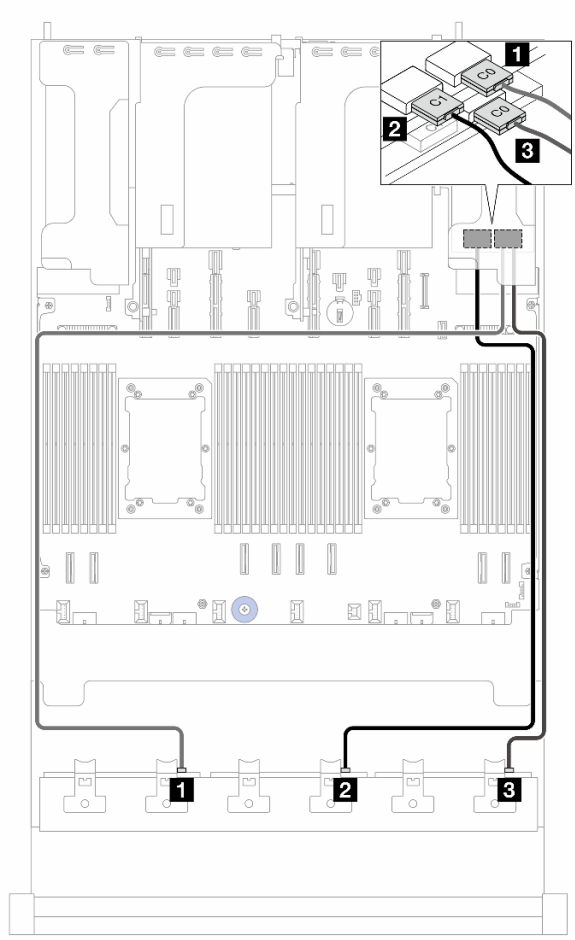

Figure 15. Cable routing to SFF 8i/16i adapter

From	To		Cable length
1 BP1: SAS	1 8i adapter: • Gen 4: C0 • Gen 3: C0C1	1 16i adapter: • Gen 4: C0 • Gen 3: C0C1	900 mm
2 BP2: SAS	2 8i adapter: • Gen 4: C0 • Gen 3: C0C1	2 • Gen 4: C1 • Gen 3: C2C3	900 mm
3 BP3: SAS	3 8i adapter: • Gen 4: C0 • Gen 3: C0C1	3 8i adapter: • Gen 4: C0 • Gen 3: C0C1	900 mm

Cable routing to CFF 16i adapter (config. 2/5/8)

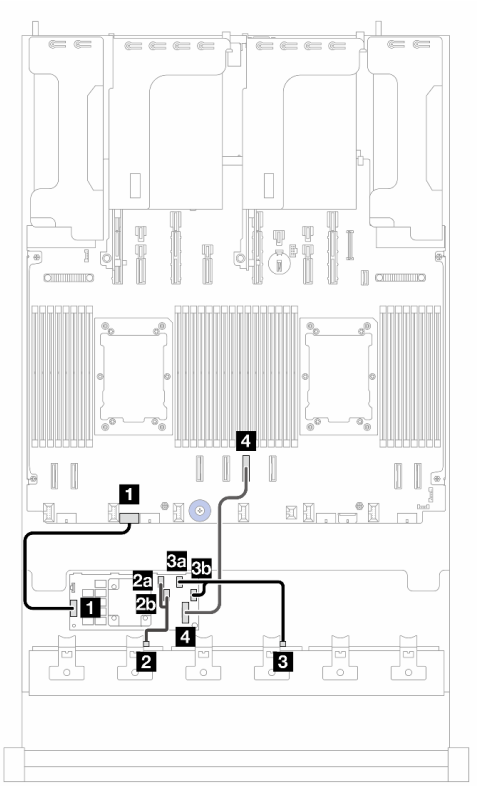

Figure 16. Cable routing when two processors are installed

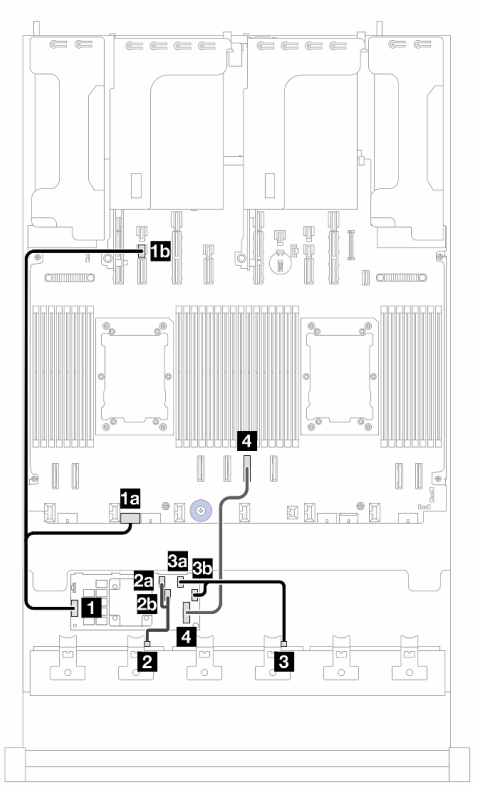

Figure 17. Cable routing when one processor is installed

2P: two processors; 1P: one processor; PB: processor board

From (CFF 16i adapter)	To		Cable length
	2P	1P	
1 POWER	1 PB: RAID PWR	1a PB: RAID PWR 1b PB: PWR 14	• 2P: 210 mm • 1P: 300/800 mm
2a C0 2b C1	2 BP1: SAS	2 BP1: SAS	140/140 mm

4 MB (CFF INPUT)	4 PB: PCIe 4	4 PB: PCIe 4	450 mm

Cable routing to SFF 8i adapter (config. 8)

Note: The location of the adapter and cable connectors on the adapter may differ from those shown in the illustration. For details, see the table below.

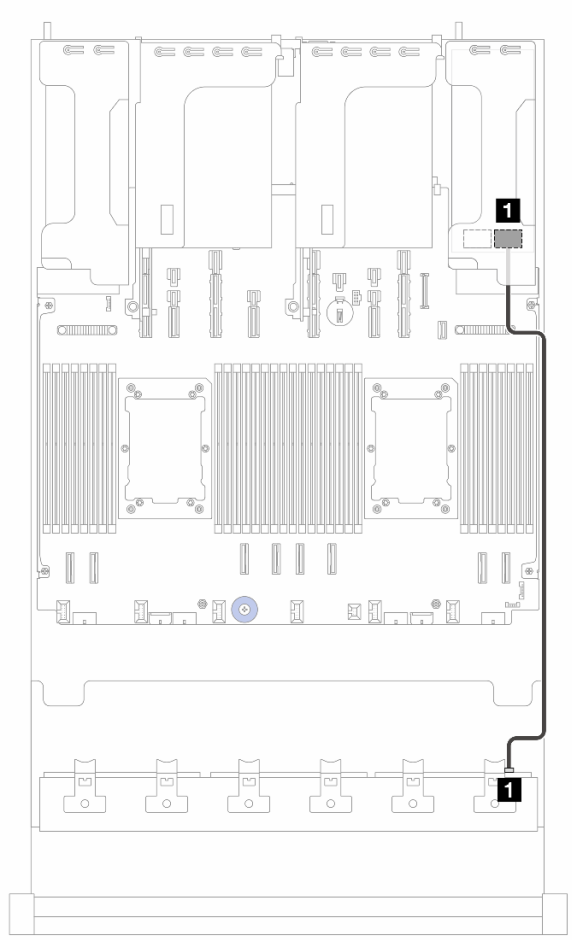

Figure 18. Cable routing to SFF 8i adapter

From	To	Cable length
1 BP3: SAS	1 8i adapter: C0	900 mm

8/16/24 x 2.5" AnyBay (tri-mode)

This topic provides cable routing information for the 8 x 2.5"/16 x 2.5"/24 x 2.5" AnyBay (tri-mode) configuration.

- "Cable routing to SFF 8i/16i adapter (config. 1/3/4/6/7)" on page 30
- "Cable routing to CFF 16i adapter (config. 2/5/8)" on page 31
- "Cable routing to SFF 8i adapter (config. 8)" on page 32

The configuration numbers in the table below are for descriptive purposes only.

BP config.	Storage controller	Config. No.
8 x 2.5" AnyBay (BP1)	1 x SFF 8i/16i (tri-mode)	1
	1 x CFF 16i (tri-mode)	2
16 x 2.5" AnyBay (BP1 + BP2)	2 x SFF 8i (tri-mode)	3

BP config.	Storage controller	Config. No.
	1 x SFF 16i (tri-mode)	4
	1 x CFF 16i (tri-mode)	5
24 x 2.5" AnyBay (BP1 + BP2 + BP3)	3 x SFF 8i (tri-mode)	6
	SFF 16i + 8i (tri-mode)	7
	SFF 8i + CFF 16i (tri-mode)	8

Cable routing to SFF 8i/16i adapter (config. 1/3/4/6/7)

Notes:
- The location of the adapter and cable connectors on the adapter may differ from those shown in the illustration. For details, see the table below.
- Cable 3 is needed only in the 3 x SFF 8i or SFF 16i + 8i configuration.

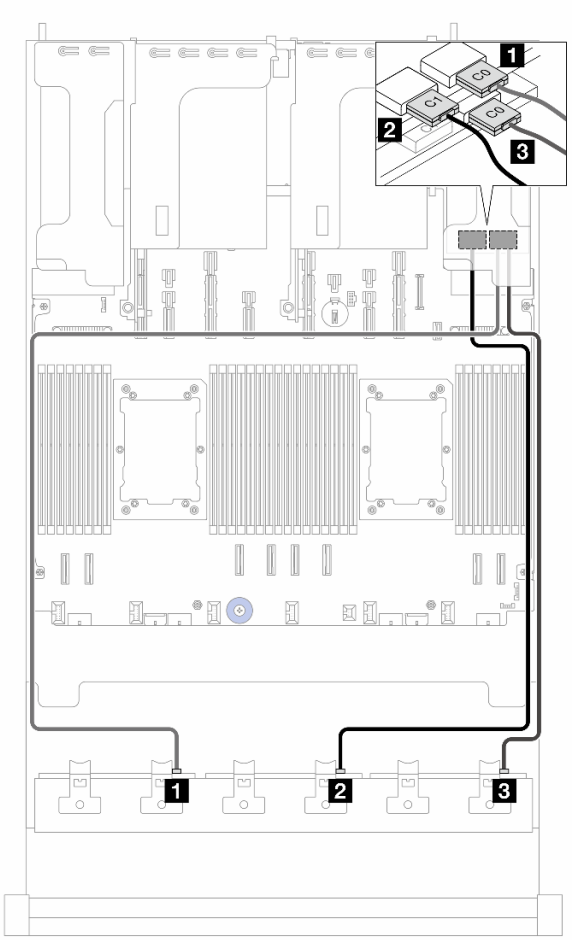

Figure 19. Cable routing to SFF 8i/16i adapter

From	To		Cable length
1 BP1: SAS	1 8i adapter: • Gen 4: C0 • Gen 3: C0C1	1 16i adapter: • Gen 4: C0 • Gen 3: C0C1	900 mm

NVMe cable routing to BP10 and BP11

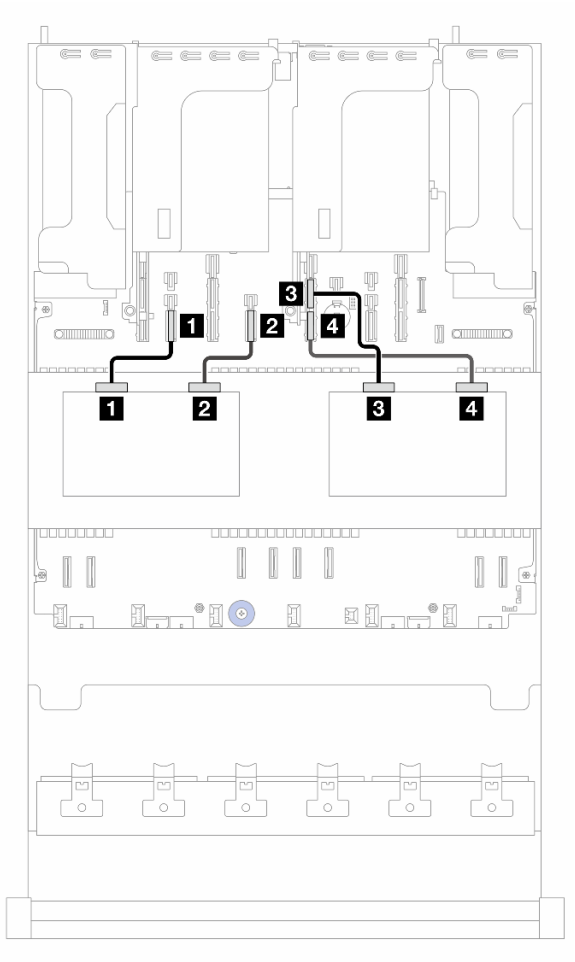

Figure 110. NVMe cable routing to BP10 and BP11

From	To (processor board)	Cable length
1 BP10: NVMe 0-1	1 PCIe 14	280 mm
2 BP10: NVMe 2-3	2 PCIe 12	280 mm
3 BP11: NVMe 0-1	3 PCIe 11A	280 mm
4 BP11: NVMe 2-3	4 PCIe 11B	280 mm

Drive backplane cable routing: 2.5-inch chassis with Compute Complex Neptune Core Module

This section provides backplane cable connection information for server models with 2.5" front drive bays and Compute Complex Neptune Core Module.

Power cable connections

For power cable connections, see “Drive backplane cable routing: 2.5-inch chassis without Compute Complex Neptune Core Module” on page 24.

Signal cable connections

- “Cable routing to SFF 8i/16i adapter (config. 1/4/6/9/11/13)” on page 103
- “NVMe cable routing (config. 8/9/10/11/12/13/14)” on page 104
- “Cable routing to CFF 16i adapter (config. 5/10/12/14)” on page 106
- “NVMe cable routing (config. 3/4/5)” on page 108
- “Cable routing to CFF 16i adapter (config. 2/7)” on page 108

The configuration numbers in the table below are for descriptive purposes only.

BP config.	Storage controller	Config. No.
8 x 2.5" SAS/SATA (BP1) 8 x 2.5" AnyBay (tri-mode)	1 x SFF 8i/16i	1
	1 x CFF 16i	2
8 x 2.5" NVMe (BP1)	N/A	3
8 x 2.5" AnyBay (BP1)	1 x SFF 8i/16i	4
	1 x CFF 16i	5
16 x 2.5" SAS/SATA (BP1 + BP2) 16 x 2.5" AnyBay (tri-mode)	2 x SFF 8i or 1 x SFF 16i	6
	1 x CFF 16i	7
16 x 2.5" NVMe (BP1 + BP2)	N/A	8
8 x 2.5" AnyBay + 8 x 2.5" NVMe (BP1 + BP2)	1 x SFF 8i/16i	9
	1 x CFF 16i	10
8 x 2.5" SAS/SATA + 8 x 2.5" AnyBay (BP1 + BP2)	2 x SFF 8i or 1 x SFF 16i	11
	1 x CFF 16i	12
8 x 2.5" SAS/SATA + 8 x 2.5" NVMe (BP1 + BP2)	1 x SFF 8i/16i	13
	1 x CFF 16i	14

Cable routing to SFF 8i/16i adapter (config. 1/4/6/9/11/13)

Notes:

- The location of the adapter and cable connectors on the adapter may differ from those shown in the illustration. For details, see the table below.
- Cable 2 is needed only in configurations with 8 x 2.5" SAS/SATA or AnyBay BP2.

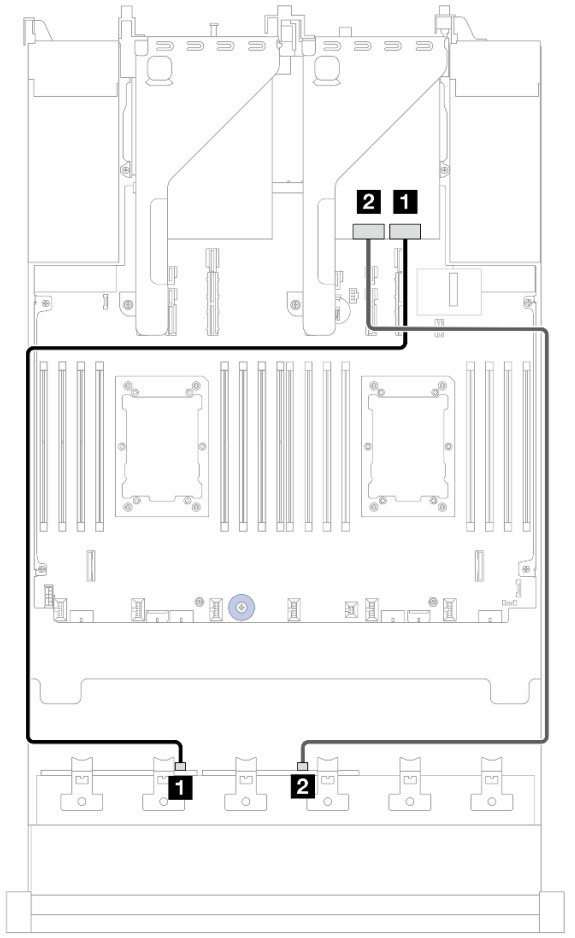

Figure 111. Cable routing to SFF 8i/16i adapter

From	To		Cable length
1 BP1: SAS	1 8i adapter: • Gen 4: C0 • Gen 3: C0C1	1 16i adapter: • Gen 4: C0 • Gen 3: C0C1	900 mm
2 BP2: SAS	2 8i adapter: • Gen 4: C0 • Gen 3: C0C1	2 • Gen 4: C1 • Gen 3: C2C3	900 mm

NVMe cable routing (config. 8/9/10/11/12/13/14)

Note: NVMe cable routing to BP1 is applicable only to configurations with 8 x 2.5" AnyBay or NVMe BP1 (config. 8/9/10).

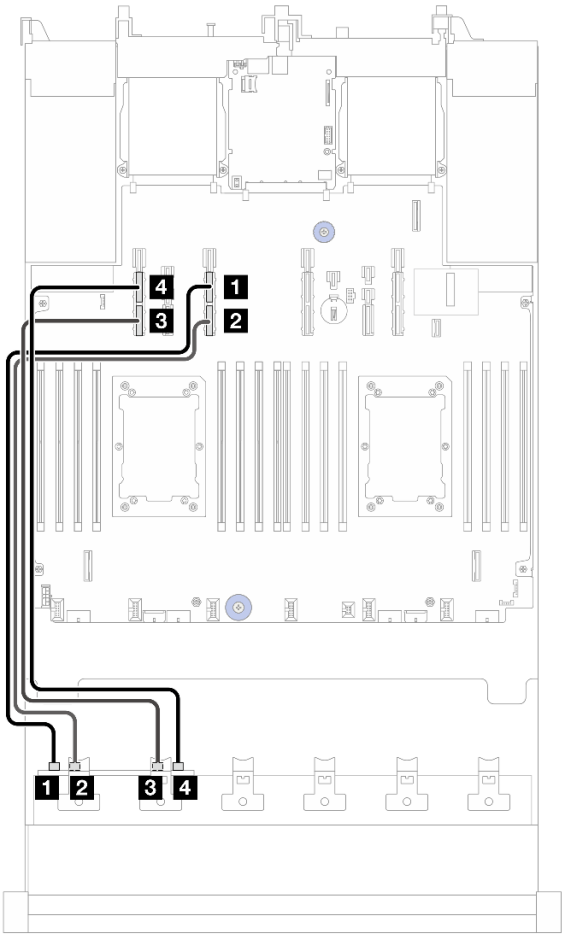

Figure 112. NVMe cable routing to BP1

From (BP1)	To (processor board)	Cable length
1 NVMe 0-1	1 PCIe 13A	600 mm
2 NVMe 2-3	2 PCIe 13B	600 mm
3 NVMe 4-5	3 PCIe 15B	600 mm
4 NVMe 6-7	4 PCIe 15A	600 mm

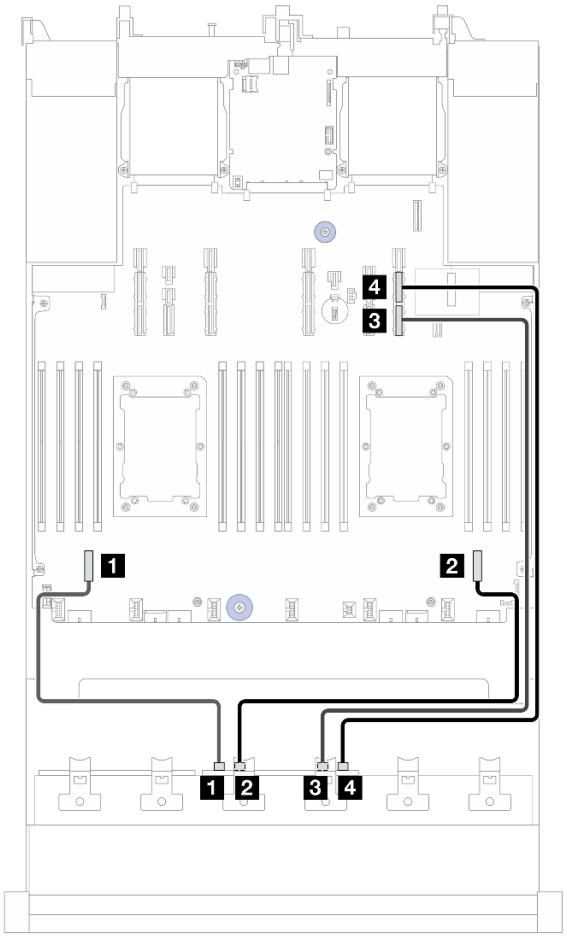

Figure 113. NVMe cable routing to BP2

4 MB (CFF INPUT)	4 PB: PCIe 7	450 mm

Drive backplane cable routing: 3.5-inch chassis

This section provides backplane cable connection information for server models with 3.5-inch front drive bays.

Power cable connections

Notes:

- For connectors on each drive backplane, see “Drive backplane connectors” on page 1.
  - Front backplane (BP1):
    - 12 x 3.5-inch SAS/SATA front backplane (also used as an 8 x 3.5-inch SAS/SATA front backplane when the upper four drive bays are left empty)
    - 12 x 3.5-inch AnyBay front backplane (also used as a 12 x 3.5-inch NVMe front backplane when only NVMe connectors on the backplane are cabled)
  - Middle backplanes (BP10/11):
    - 4 x 2.5-inch AnyBay middle/rear backplane (also used as a 4 x 2.5-inch NVMe middle/rear backplane when only NVMe connectors on the backplane are cabled)
  - Rear backplane (BP9):
    - 4 x 2.5-inch AnyBay middle/rear backplane (also used as a 4 x 2.5-inch NVMe middle/rear backplane when only NVMe connectors on the backplane are cabled)
    - 4 x 3.5-inch SAS/SATA rear backplane
- The following uses the 4 x 3.5-inch rear backplane as an example of BP9 for illustration. The cable routing for 4 x 2.5-inch rear backplane is similar.

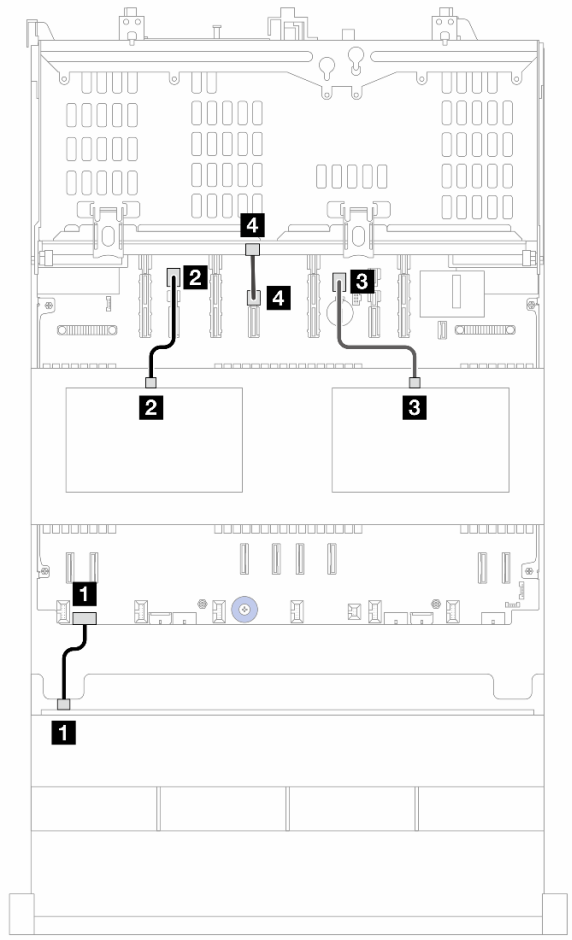

Figure 117. Power cable connections

From	To (processor board)	Length
1 BP1: PWR	1 PWR 1	• SAS/SATA: 250 mm • AnyBay: 280 mm
2 BP10: PWR	2 PWR 23	250 mm
3 BP11: PWR	3 PWR 21	250 mm
4 BP9: PWR	4 PWR 12	250 mm

Signal cable connections

Refer to the specific topic for signal cable connections depending on the backplanes you have installed.

- “12 x 3.5-inch SAS/SATA backplane” on page 111
- “12 x 3.5-inch AnyBay backplane” on page 121

12 x 3.5-inch SAS/SATA backplane

This section provides cable routing information for the server model with the 12 x 3.5-inch SAS/SATA front drive backplane.

- “Front 12 x 3.5"/8 x 3.5" SAS/SATA” on page 112
- “Front 12 x 3.5" SAS/SATA + Middle 8 x 2.5" NVMe” on page 113

- “Front 12 x 3.5" SAS/SATA + Rear 4 x 2.5" AnyBay” on page 114
- “Front 12 x 3.5" SAS/SATA + Rear 4 x 2.5" NVMe” on page 117
- “Front 12 x 3.5" SAS/SATA + Rear 4 x 3.5" SAS/SATA” on page 119

Front 12 x 3.5"/8 x 3.5" SAS/SATA

This topic provides cable routing information for the front 12 x 3.5"/8 x 3.5" SAS/SATA configuration.

Note: The location of the adapter and cable connectors on the adapter may differ from those shown in the illustration. For details, see the table below.

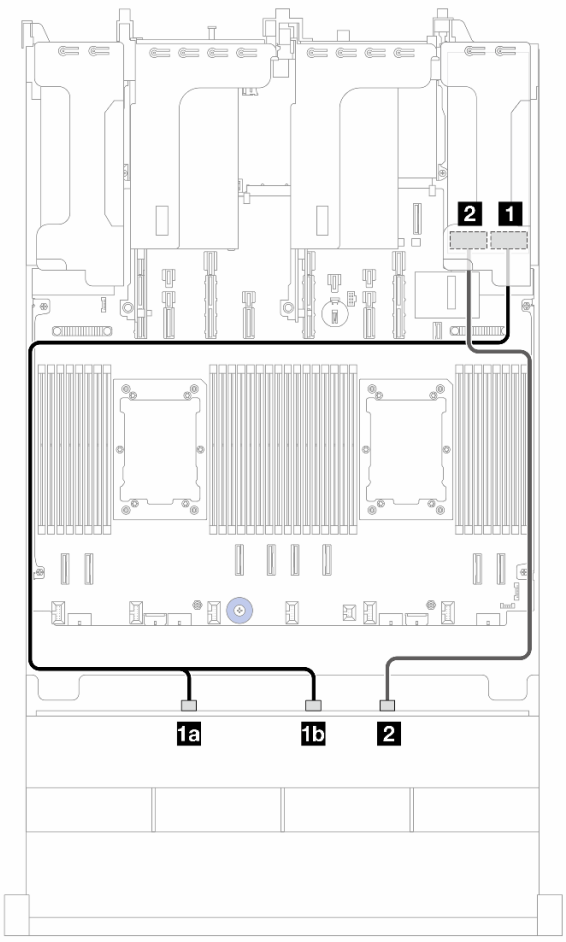

Figure 118. SAS/SATA cable routing to SFF 16i adapter

From (BP1)	To (16i adapter)	Cable length
1a SAS 0	1 • Gen 4: C0 • Gen 3: C0C1	• Gen 4: 900/1020 mm • Gen 3: 820/1020 mm
1b SAS 1		
2 SAS 2	2 • Gen 4: C1 • Gen 3: C2	900 mm

Front 12 x 3.5" SAS/SATA + Middle 8 x 2.5" NVMe

This topic provides cable routing information for the front 12 x 3.5" SAS/SATA + middle 8 x 2.5" NVMe configuration.

- "Front backplane cable routing" on page 113
- "Middle backplane cable routing" on page 114

Front backplane cable routing

Note: The location of the adapter and cable connectors on the adapter may differ from those shown in the illustration. For details, see the table below.

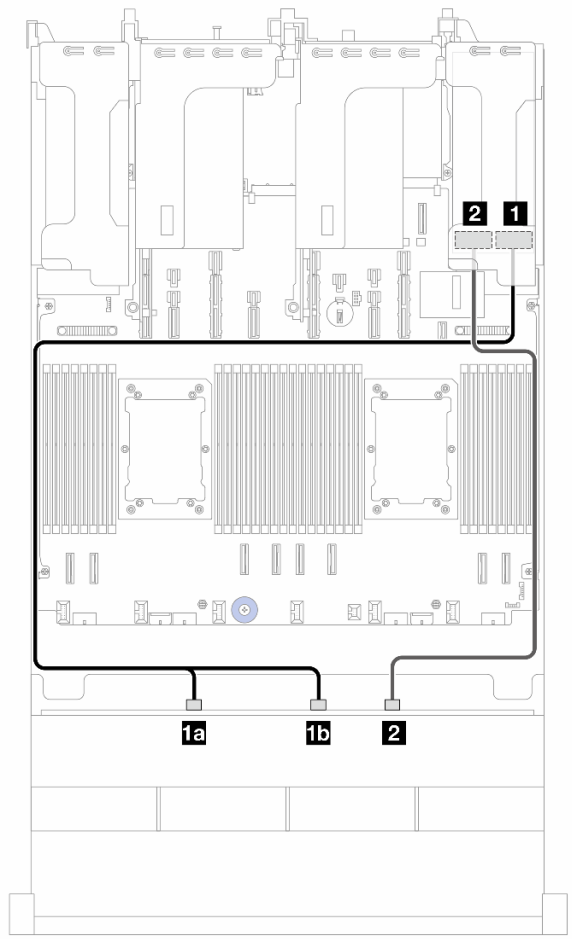

Figure 119. SAS/SATA cable routing to SFF 16i adapter

From (BP1)	To (16i adapter)	Cable length
1a SAS 0 1b SAS 1	1 • Gen 4: C0 • Gen 3: C0C1	• Gen 4: 900/1020 mm • Gen 3: 820/1020 mm
2 SAS 2	2 • Gen 4: C1 • Gen 3: C2	900 mm

Middle backplane cable routing

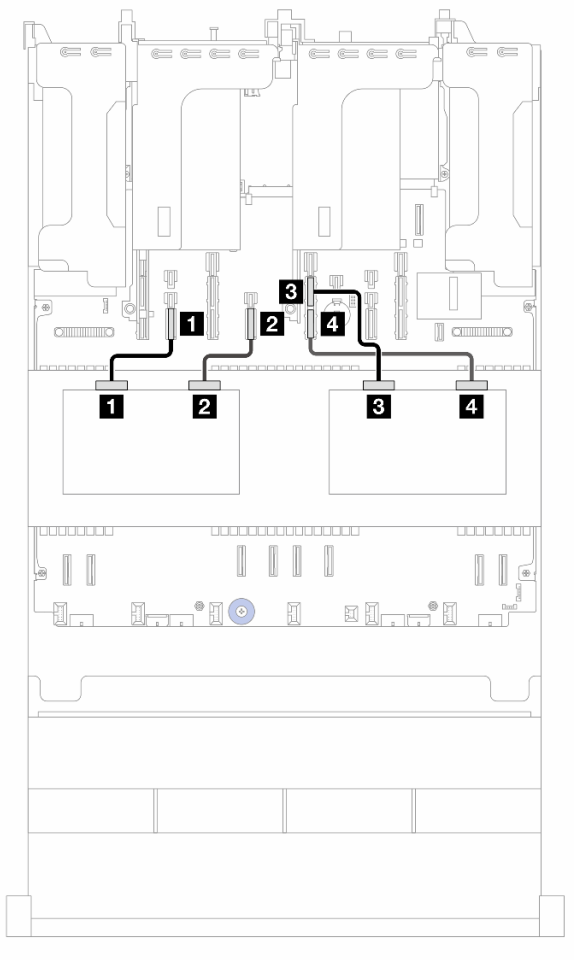

Figure 120. Middle backplane cable routing

From	To (processor board)	Cable length
1 BP10: NVMe 0-1	1 PCIe 14	280 mm
2 BP10: NVMe 2-3	2 PCIe 12	280 mm
3 BP11: NVMe 0-1	3 PCIe 11A	280 mm
4 BP11: NVMe 2-3	4 PCIe 11B	280 mm

Front 12 x 3.5" SAS/SATA + Rear 4 x 2.5" AnyBay

This topic provides cable routing information for the front 12 x 3.5" SAS/SATA + rear 4 x 2.5" AnyBay configuration.

- "SAS/SATA cable routing" on page 114
- "NVMe cable routing" on page 117

SAS/SATA cable routing

Note: The location of the adapter and cable connectors on the adapter may differ from those shown in the illustration. For details, see the table below.

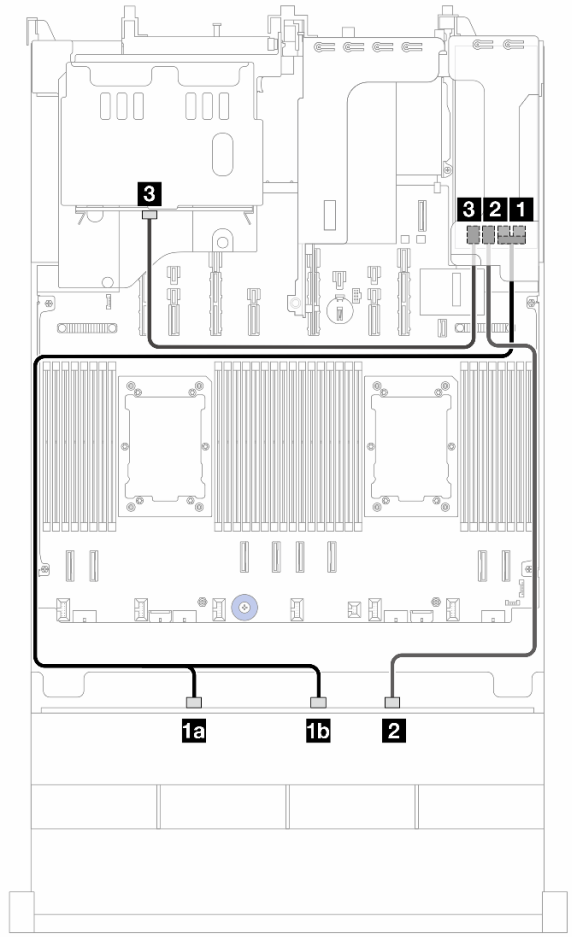

Figure 121. SAS/SATA cable routing to SFF 16i adapter (Gen 3)

From	To (16i adapter)	Cable length
1a BP1: SAS 0	1 C0C1	820/1020 mm
1b BP1: SAS 1		
2 BP1: SAS 2	2 C2	900 mm

E3.S backplane cable routing: E3.S chassis with Compute Complex Neptune Core Module

This section provides backplane cable connection information for server models with front E3.S bays and Compute Complex Neptune Core Module.

- “Supported E3.S configurations” on page 133
- “Power cable connections” on page 134
- “Signal cable connections” on page 135

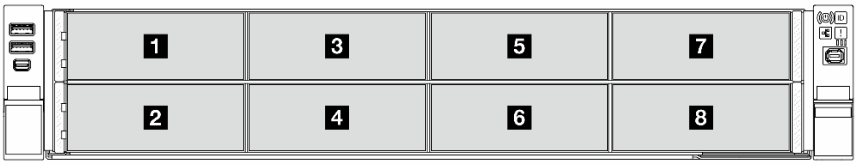

Figure 137. E3.S backplane numbering

Supported E3.S configurations

The table below lists the E3.S configurations supported by servers with Compute Complex Neptune Core Module.

1T: E3.S hot-swap drive

BP1	BP2	BP3	BP4	BP5	BP6	BP7	BP8
Processor 2				Processor 1			
4x1T				4x1T			
4x1T		4x1T		4x1T		4x1T	

Power cable connections

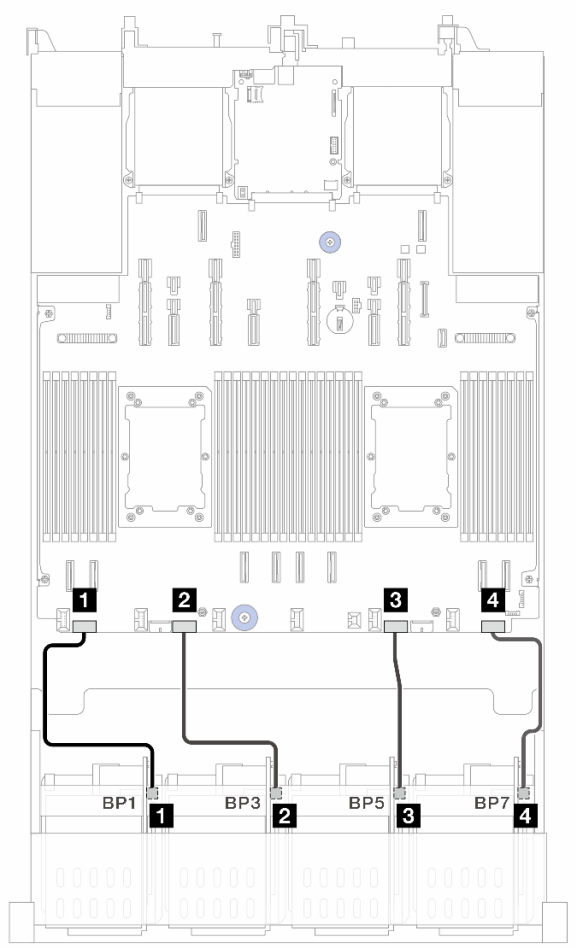

Figure 138. Power cable connections

From	To (processor board)	Cable length
1 BP1: PWR	1 PWR 1	250 mm
2 BP3: PWR	2 PWR 2	250 mm
3 BP5: PWR	3 PWR 3	250 mm
4 BP7: PWR	4 PWR 4	250 mm

Signal cable connections

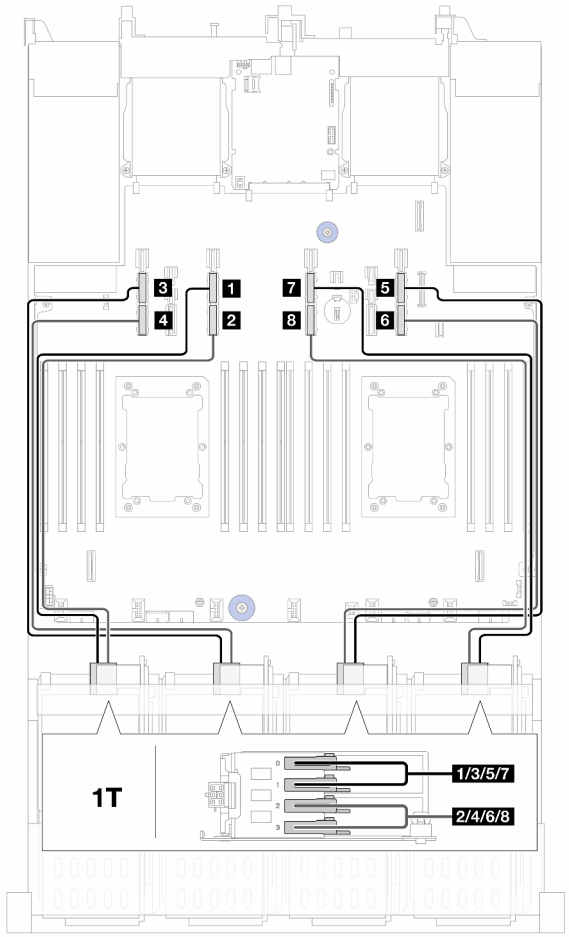

Figure 139. Signal cable connections

From	To (processor board)	Cable length
1 BP1: Bay 0, Bay 1	1 PCIe 13A	630 mm
2 BP1: Bay 2, Bay 3	2 PCIe 13B	630 mm
3 BP3: Bay 0, Bay 1	3 PCIe 15A	630 mm
4 BP3: Bay 2, Bay 3	4 PCIe 15B	630 mm
5 BP5: Bay 0, Bay 1	5 PCIe 9A	630 mm
6 BP5: Bay 2, Bay 3	6 PCIe 9B	630 mm
7 BP7: Bay 0, Bay 1	7 PCIe 11A	630 mm
8 BP7: Bay 2, Bay 3	8 PCIe 11B	630 mm

Appendix A. Documents and supports

This section provides handy documents, driver and firmware downloads, and support resources.

Documents download

This section provides introduction and download link for handy documents.

Documents

Download the following product documentations at:

https://pubs.lenovo.com/sr650-v4/pdf_files

- ***Rail Installation Guides***
  - Rail installation in a rack
- ***CMA Installation Guide***
  - Cable management arm (CMA) installation in a rack
- ***User Guide***
  - Complete overview, system configuration, hardware components replacing, and troubleshooting.

    Selected chapters from *User Guide*:
    - ***System Configuration Guide* :** Server overview, components identification, system LEDs and diagnostics display, product unboxing, setting up and configuring the server.
    - ***Hardware Maintenance Guide* :** Installing hardware components, cable routing, and troubleshooting.
- ***PCIe Slot Installation Guide***
  - PCIe slot installation rules.
- ***Cable Routing Guide***
  - Cable routing information.
- ***Messages and Codes Reference***
  - XClarity Controller, LXPM, and UEFI events
- ***UEFI Manual***
  - UEFI setting introduction

Note: SR650 V4 configured with Processor Neptune Core Module or Compute Complex Neptune Core Module can be installed in the ThinkSystem Heavy Duty Full Depth Rack Cabinets. For ThinkSystem Heavy Duty Full Depth Rack Cabinets User Guide, see ThinkSystem Heavy Duty Full Depth Rack Cabinets User Guide.

Support websites

This section provides driver and firmware downloads and support resources.

Appendix B. Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area.

Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any other product, program, or service.

Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document is not an offer and does not provide a license under any patents or patent applications. You can send inquiries in writing to the following:

Lenovo (United States), Inc.
8001 Development Drive
Morrisville, NC 27560
U.S.A.
Attention: Lenovo Director of Licensing

LENOVO PROVIDES THIS PUBLICATION “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. Lenovo may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

The products described in this document are not intended for use in implantation or other life support applications where malfunction may result in injury or death to persons. The information contained in this document does not affect or change Lenovo product specifications or warranties. Nothing in this document shall operate as an express or implied license or indemnity under the intellectual property rights of Lenovo or third parties. All information contained in this document was obtained in specific environments and is presented as an illustration. The result obtained in other operating environments may vary.

Lenovo may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Any references in this publication to non-Lenovo Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this Lenovo product, and use of those Web sites is at your own risk.

Any performance data contained herein was determined in a controlled environment. Therefore, the result obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Trademarks

LENOVO, THINKSYSTEM, and XCLARITY are trademarks of Lenovo.

Intel and Xeon are trademarks of Intel Corporation in the United States, other countries, or both. NVIDIA is a trademark and/or registered trademarks of NVIDIA Corporation in the U.S. and/or other countries. Microsoft and Windows are trademarks of the Microsoft group of companies. Linux is a registered trademark of Linus Torvalds. All other trademarks are the property of their respective owners. © 2023 Lenovo.

Important notes

Processor speed indicates the internal clock speed of the processor; other factors also affect application performance.

CD or DVD drive speed is the variable read rate. Actual speeds vary and are often less than the possible maximum.

When referring to processor storage, real and virtual storage, or channel volume, KB stands for 1 024 bytes, MB stands for 1 048 576 bytes, and GB stands for 1 073 741 824 bytes.

When referring to hard disk drive capacity or communications volume, MB stands for 1 000 000 bytes, and GB stands for 1 000 000 000 bytes. Total user-accessible capacity can vary depending on operating environments.

Maximum internal hard disk drive capacities assume the replacement of any standard hard disk drives and population of all hard-disk-drive bays with the largest currently supported drives that are available from Lenovo.

Maximum memory might require replacement of the standard memory with an optional memory module.

Each solid-state memory cell has an intrinsic, finite number of write cycles that the cell can incur. Therefore, a solid-state device has a maximum number of write cycles that it can be subjected to, expressed as `total bytes written` (TBW). A device that has exceeded this limit might fail to respond to system-generated commands or might be incapable of being written to. Lenovo is not responsible for replacement of a device that has exceeded its maximum guaranteed number of program/erase cycles, as documented in the Official Published Specifications for the device.

Lenovo makes no representations or warranties with respect to non-Lenovo products. Support (if any) for the non-Lenovo products is provided by the third party, not Lenovo.

Some software might differ from its retail version (if available) and might not include user manuals or all program functionality.

Electronic emission notices

When you attach a monitor to the equipment, you must use the designated monitor cable and any interference suppression devices that are supplied with the monitor.

Additional electronic emissions notices are available at:

https://pubs.lenovo.com/important_notices/

備考1. 〝超出0.1 wt %〞及〝超出0.01 wt %〞係指限用物質之百分比含量超出百分比含量基準值。

Note1 : “exceeding 0.1wt%” and “exceeding 0.01 wt%” indicate that the percentage content of the restricted substance exceeds the reference percentage value of presence condition.

備考2. 〝○〞係指該項限用物質之百分比含量未超出百分比含量基準值。

Note2 : “○”indicates that the percentage content of the restricted substance does not exceed the percentage of reference value of presence.

備考3. 〝-〞係指該項限用物質為排除項目。

Note3 : The “-“ indicates that the restricted substance corresponds to the exemption.

Taiwan Region import and export contact information
