

Cable Management Arm (CMA) Installation Guide

CMA kit parts inventory

This CMA kit is for the Toolless Slide Rail Kit.

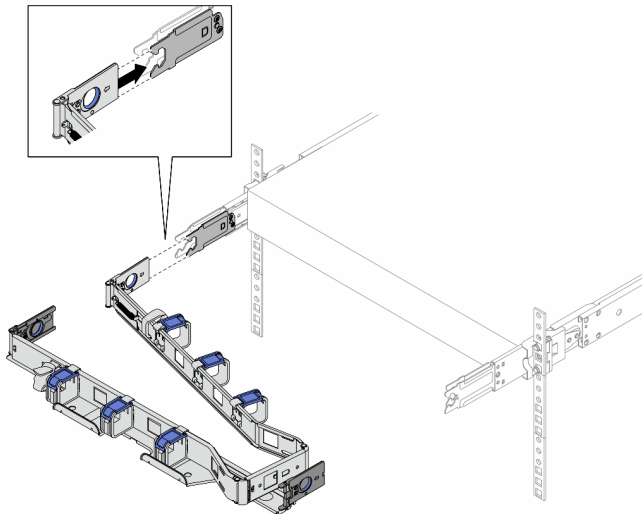

- 1** Retaining clip
- 2** Inner mounting clip
- 3** Cable strap
- 4** Outer mounting clip
- 5** Support bar
- 6** Cable basket

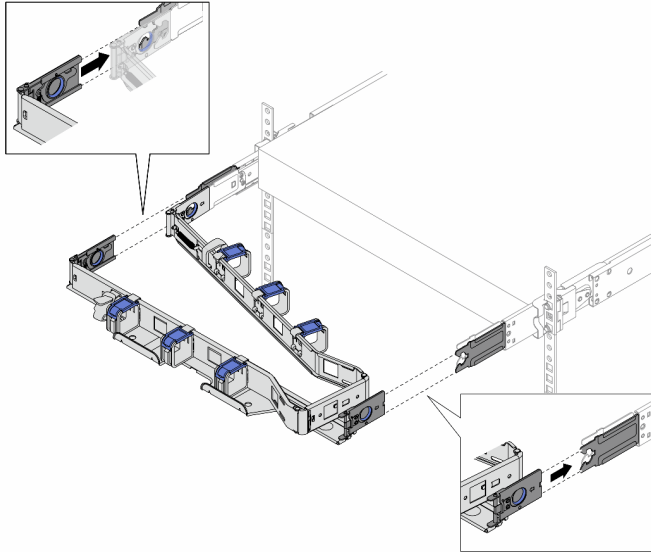

Install the CMA

Note: The following illustrations might differ depending on the server, but the installation method is the same.

Step 1. Align the inner mounting clip with the inner tab on the slide; then, push it until it snaps into place.

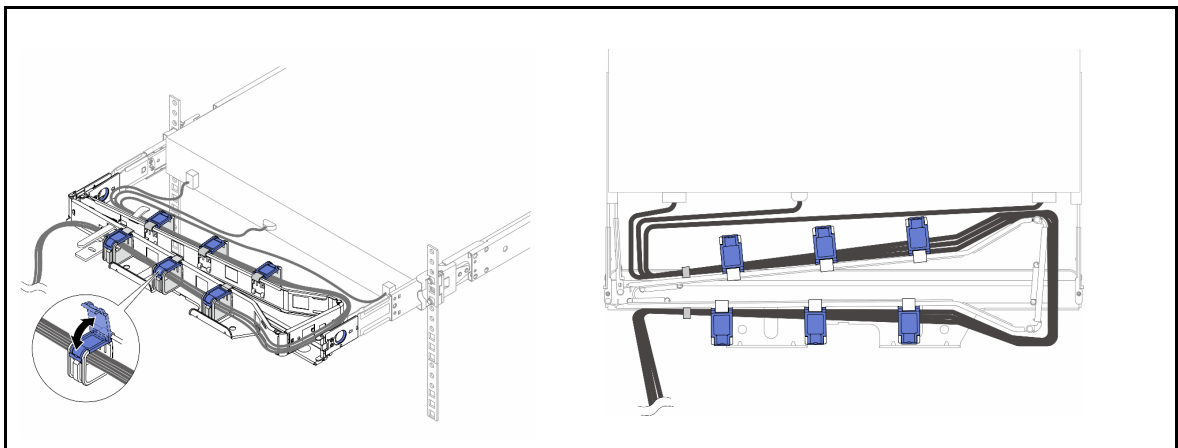

Step 2. Align two outer mounting clips with the outer tabs on the slides; then, push them until they snap into place.

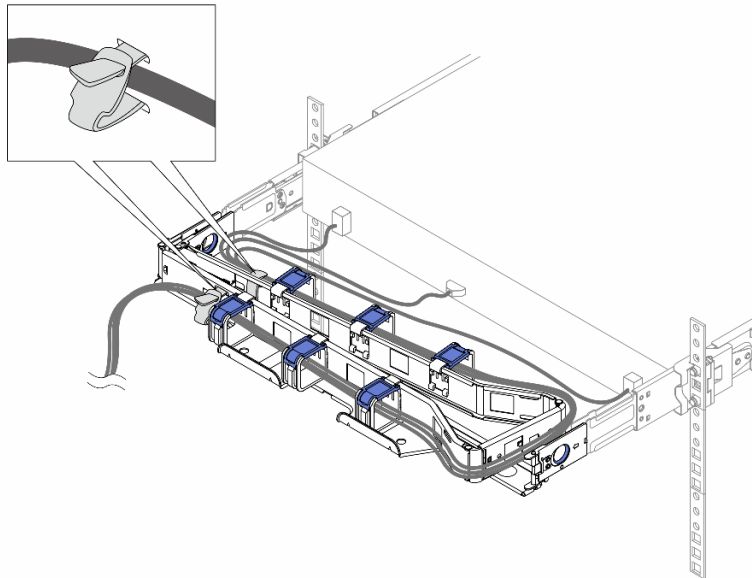

Connect and route cables

Note: The following illustrations might differ depending on the server, but the installation method is the same.

- Step 1. Attach the power cords and other cables to the rear of the server; then, open the blue retaining clips on the cable baskets to route the cables and power cords in the direction as shown. Properly close them all afterwards.

- Step 2. Use the cable straps to tightly secure the cables to the front and rear of the CMA.

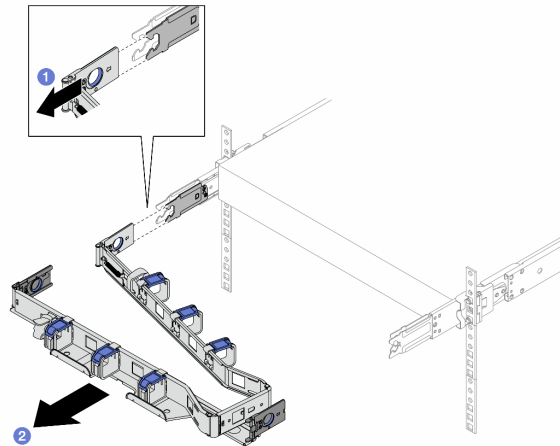

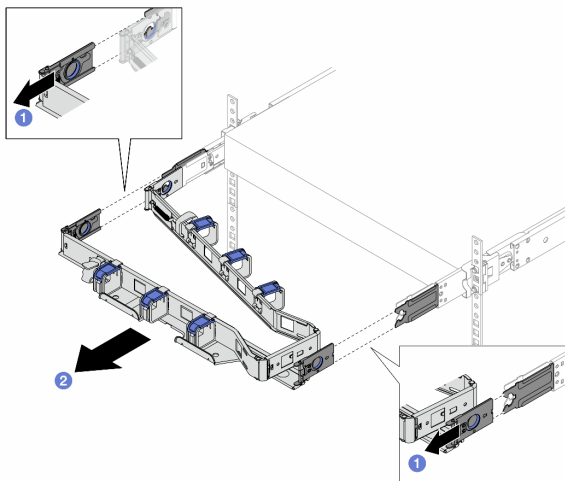

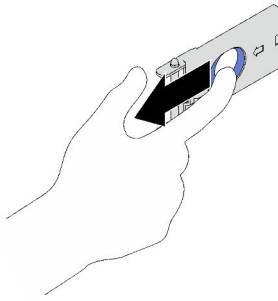

Attention: Carefully slide the server back and forward to ensure the cables do not pinch, bind, or hang down into the U space directly below the server.

Remove the CMA

Note: The following illustrations might differ depending on the server, but the installation method is the same.

Attention: Release the mounting clip by pulling the ring-shaped release latch as illustrated.

Attention: Disconnect all the cables first.

- 1 Pull both release latches to disengage.
- 2 Remove the outer mounting clips.
- 3 Pull the release latch on the inner mounting clip to disengage.
- 4 Remove the CMA completely out of the slide rails.
